Performance Wake-up

Speed was a <u>company-wide initiative</u> for eBay starting in 2019, with many teams determined to make the site and apps as fast as possible for users.

For every 100 milliseconds improvement in search page loading time, eBay saw a 0.5% increase in "Add to Cart" count.

Improvement in load time

0.5%

Increase in "Add to Cart" count

Would you be willing to slow your site down

Uncomfortable, isn't it?

"A 2012 detailed study at Bing (Kohavi et al.2013) showed that every 100 ms speedup improves revenue by 0.6%."*

*Kohavi, Ron; Tang, Diane; Xu, Ya. Trustworthy Online Controlled Experiments: A Practical Guide to A/B Testing (p. 82).

Performance optimization is just... optimization.

SnipesUSA.com decreased page load speed by 30% and saw its average conversion rate double to from 1% to 2%.

PERMALINK SHARE ON TWITTER

Yelp reduced First Contentful Paint (75th percentile) by 45% and Yelp Page Complete (75th percentile) by 25% and saw a 15% improvement in their conversion rate.

#2021

PERMALINK SHARE ON TWITTER

Bing observed that an engir performance by 10ms (that' blink) more than pays for hi millisecond counts AliExpress reduced load time by 36% and saw a 10.5% increase in orders and a 27% increase in conversion for new customers.

Core Web Vitals as a Google Ranking Factor: What You Need ...

18 okt. 2021 — **Google has confirmed that yes, Core Web Vitals are a ranking factor**. Google's web.dev offers great advice on how to improve your LCP, FID, and ...

Ryan Jones • 2nd 23h • 🕤

Let's talk about page speed/performance. SEOS love it because it's a # and no matter what a site starts at, you can always do something to show improvement in that number.

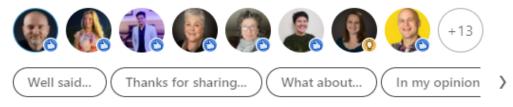

But does it matter? Google has said on record that it's literally the smallest weight possible in the algorithm. That means, time spent doing literally anything else that will impact your site will have a bigger impact.

Should you ignore page performance? No. But quit with the tools and the obsession. If you have a performance problem, you'll know it without the tools. That's when it's time to act.

There's SEOs who only care about bringing in traffic. For them, indeed there's almost no gain to be had.

But then there's the better SEOs who not only bring in traffic, but get judged on how well it converts. For those, Core Web Vitals, web performance and perceived performance does matter of course. No performance = fewer conversions.

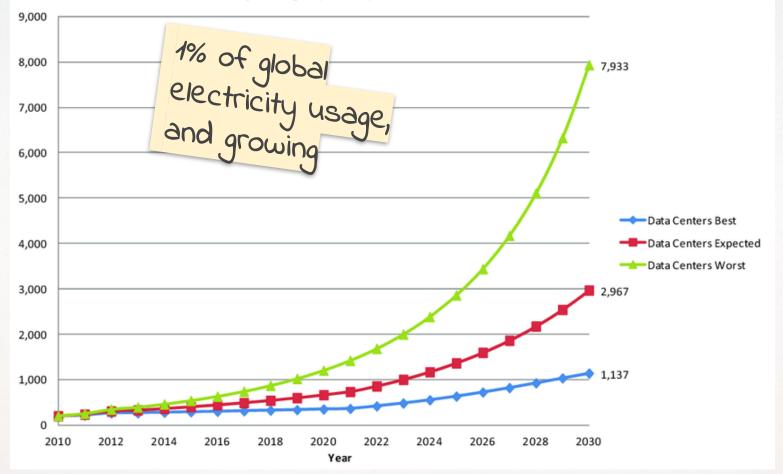

So the "anything else will have a bigger impact" part only applies to traffic acquisition. Not on actual business KPIs like revenue and profit.

Johan his excellent comment

Is this just academic?

Electricity usage (TWh) of Data Centers 2010-2030

If you want to prepare for things to come - this is a great topic. It won't silently go away, and it will only become more important. If you're annoyed by the crypto/AI-hype, this is a nice balance, there's a lot to learn, to coordinate, and to help others with.

What sthe real work of the state of the stat

Carbon results for

yoast.com/

This page was last tested on 15 Sep, 2022. Test again

Share f 🎔 in 🕓 🖂

Hurrah! This web page is cleaner than 84% of web pages tested

Over a year, with ±10,000 monthly page views, yoast.com/ produces

19.71kg of CO2 equivalent.

The same weight as 0.13 sumo wrestlers and as much CO2 as boiling water for 2,671 cups of tea

Over a year, with ±1,000,000,000,000 monthly page views, yoast.com/ produces

1.97126840535972e+27kg of CO2 equivalent.

The same weight as 1.31417893690648e+25 sumo wrestlers and as much CO2 as boiling water for 2.6710954002164228e+29 cups of tea

How's your site? (Spoiler: It's probably worse)

You have to optimize your optimizing.

"But this stuff is hard / new / alien"

How do I do it?

INP example

Like, here's an example of a frustrating user experience that has nothing to do with initial load times.

...

I click the button to add a tip. Nothing happens, so I click again, figuring I misclicked. But it's just really slow, and I wind up toggling it off. 😬

12:23 AM · Mar 13, 2024 · 19.4K Views

Q 2 **1**]3 ♥ 27 **A** 6 £

Image: Month: Apr 2020 Origin Month: Apr 2020 Origin https://developers.google.com Apr 2020

٢.,

Largest Contentful Paint (LCP)

LCP reports the render time of the largest content element that is visible within the viewport. web.dev/lcp

**

First Input Delay (FID)

FID measures the time from when a user first interacts with a page (i.e. when they click a link, tap on a button, or use a custom, JavaScript-powered control) to the time when the browser is actually able to respond to that interaction. web.dev/fid

1

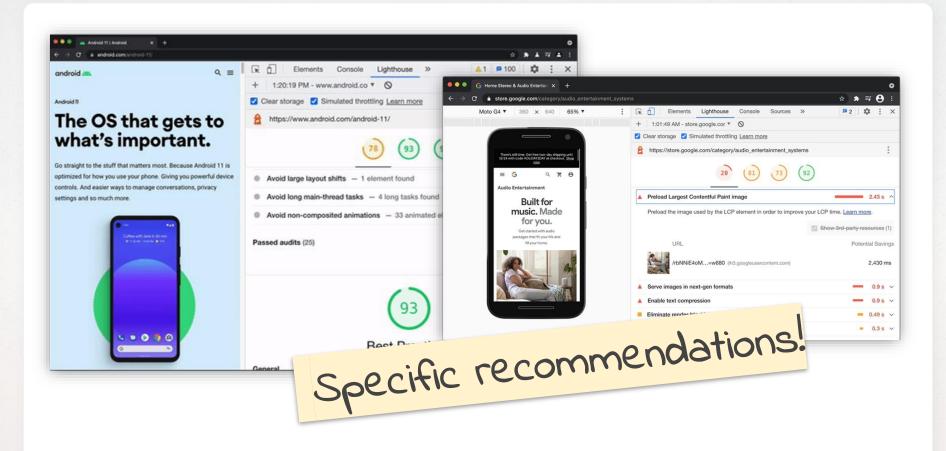

Cumulative Layout Shift (CLS)

CLS measures the sum total of all individual layout shift scores for every unexpected layout shift that occurs during the entire lifespan of the page. web.dev/cls

web.dev/chrome-ux-report-data-studio-dashboard/

CWV fixes "It's hard to quantify"

web.dev/optimize-vitals-lighthouse/

Carousels

A carousel is a UX component that displays content in a slideshow-like manner. Large, above-the-fold carousels often contain a page's Largest Contentful Paint (LCP) element, and therefore can have a significant impact on LCP. In addition, a surprising number of carousels use non-composited animations that can contribute to Cumulative Layout Shift (CLS). On pages with autoplaying carousels, this has the potential to cause infinite layout shifts.

HTML

To learn about performance and UX best practices for carousels, see Car

Autoplay carousel

Autoplay carousel

Step C: Monitor and continuous development

CrUX on BigQuery, CrUX API, PSI API, web-vitals.js

Lighthouse-Cl

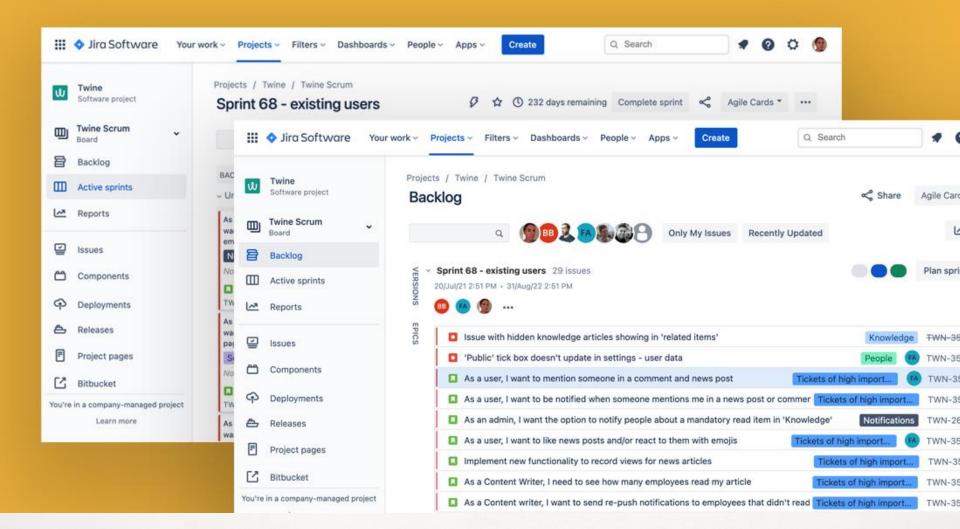

Use <u>CrUX on BigQuery</u>, <u>CrUX API</u>, <u>PSI API</u> and <u>web-vitals.js</u> to automate a website's real user data collection, to power custom dashboards and build alerting systems.

2 Use <u>Lighthouse-CI</u> to automate lab tests and prevent regressions.

web.dev/vitals-tools-workflow/

So, aren't these are all solved problems?

What happens in a real world scenario?

Maybe the wrong people (or nobody) own this?

Start with a business case

Site performance is site-wide (and therefore doesn't get prioritized)

Align with company values / goals **Environment (greener) Cost Saving** Inclusivity Profitability **Agility / Velocity**

e.g., CO2 impact

CO2 impact x pageviews = number of trees to plant to offset

or cost saving

Page transfer size x number of requests x \$

             glUniform4f(location1, 85.0f*INV_255, 184.0f*INV_255, 237.0f*INV_255, 1.0f);
 37
             glBindVertexArray(vertexArrayObj);
 38
             glDrawElements(GL_TRIANGLES, 6, GL_UNSIGNED_INT, NULL);
 39
 40
              glfwSwapBuffers(window);
 41
```

Optimised code leads to:

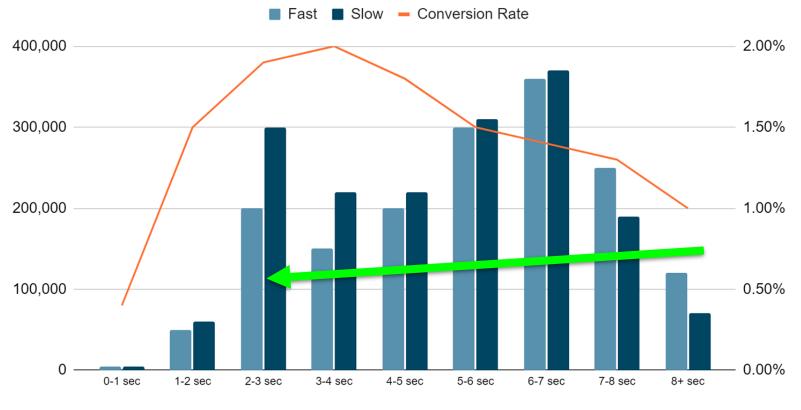

Fewer errors Easier a/b testing faster development (velocity) Easier to scale development resources

And don't forget about device tax...

A global network built for the cloud

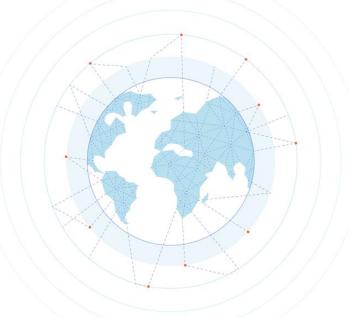

Cloudflare is a global network designed to make everything you connect to the Internet secure, private, fast, and reliable.

- Secure your websites, APIs, and Internet applications.
- · Protect corporate networks, employees, and devices.
- · Write and deploy code that runs on the network edge.

INTEGRATIONS

Angular Astro Gatsby HTML NextJS Nuxt React Remix Shopify

Run Third-Party Scripts From A Web Worker

Partytown is a lazy-loaded library to help relocate resource intensive scripts into a <u>web</u> <u>worker</u>, and off of the <u>main thread</u>. Its goal is to help speed up sites by dedicating the main thread to your code, and offloading third-party scripts to a web worker.

Even with a fast and highly tuned website following all of today's best practices, it's all too common for your performance wins to be erased the moment third-party scripts are added. By third-party scripts we mean code that is embedded within your site, but not directly under your control. A few examples include: analytics, metrics, ads, A/B testing, trackers, etc.

Partytown is maintained by Builder.io and is currently in Beta.

Smashing Magazine: How Partytown Eliminates Website Bloat From Third-Party Scripts

Goals

We set out to solve this situation, so that apps of all sizes will be able to continue to use third-party scripts without the performance hit. Some of Partytown's goals include:

- Free up main thread resources to be used only for the primary web app execution.
- Sandbox third-party scripts and allow or deny their access to main thread APIs.
- Isolate long-running tasks within the web worker thread.
- Reduce layout thrashing coming from third-party scripts by batching DOM setters/getter into group updates.
