THE BICESTER
COLLECTION

What makes people
click, convert and
come back?

I've turned data into loyalty and now lead teams
to build smarter, customer-centric strategies

The Expectation Gap

“More than 70% of consumers
expect personalization...”

- McKinsey

The Expectation Gap

....but only 20% feel they get it

- McKinsey

We're trying to personalize yesterday's
behavior in tomorrow's world

Personalization is like calling someone by their name

– *anticipation* is like bringing
their favourite coffee before they ask...

Personalization

Past actions

Basic segmentation

Anticipation

Real-time signals

Predictive intent

THE NEWS

WE ARE
CURATING FOR THE
MOST IMPATIENT
GENERATION -
IN HISTORY

Products. Services. Experiences –
all must adapt

The Consumer Lens Today

3 truths marketers can't afford to ignore

10,000+ messages/a day

→ Relevance is survival

53% bounce in 3 secs

→ It's how *fast* & *where* you say it

8-second attention span

→ Predict or get scrolled past

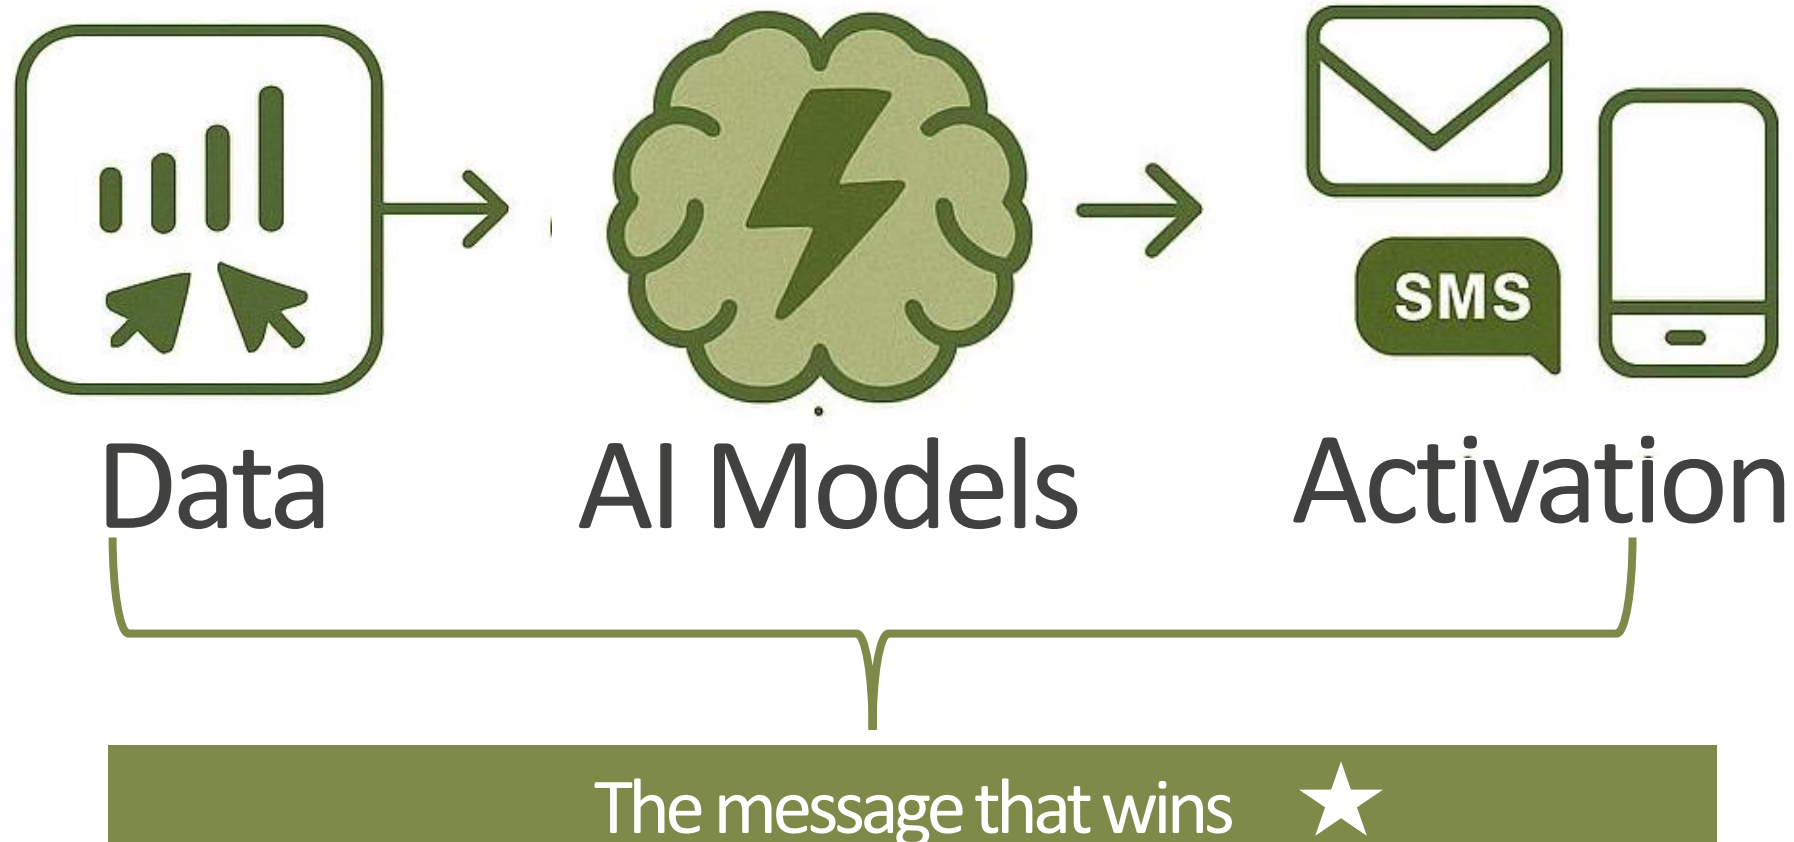

If we don't anticipate – we evaporate.

It's not just a race for attention.
It's a race for relevance.

Anticipation at Scale

Like timing a curated lifestyle offer just as Maria unwinds mid-afternoon

AI Knew Before Maria Did

Bought boots
late March

Predicted interest
in outwear

2x open rate
+15% uplift in sales

AI prediction wins ★

Smart timing. Real uplift

The Engine Behind Anticipation

Data inputs that truly capture Maria

Behavioral

Product
interests

In-boutique dwell
time

Click patterns

Transactional

Frequency
of visits

Location signals
(device-based)

Spend per visit

Contextual

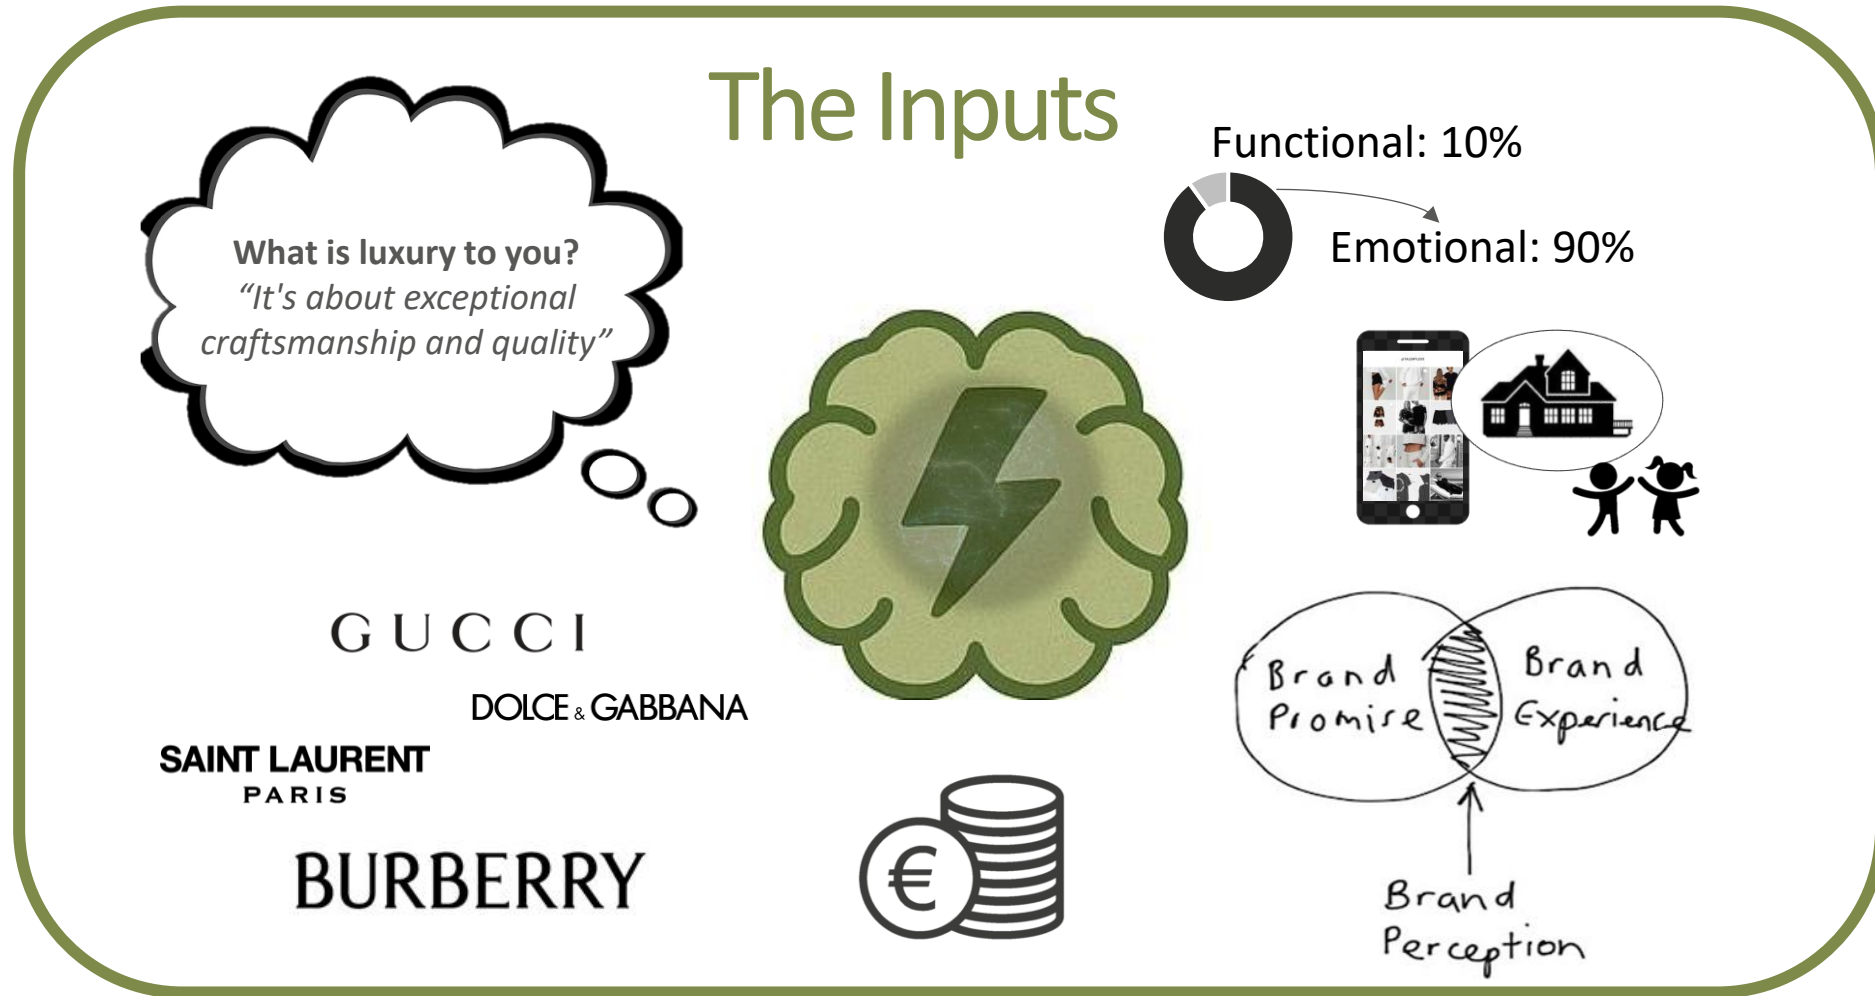

Preferred
shopping days

Home region or
residence

Sentiment score

A1 Segmentation – Signals to Personas

Segmentation model trained on Maria's behaviour

A1 Segmentation – Signals to Personas

Built in Salesforce to forecast affinity and preferences

The Outputs

Luxury affinity score

Maria's profile identifies as 'Aspirational Achiever'

The Bespoke Marketing Mindset

Sense

*Track behaviours,
location & real-time
signals*

Predict

*Anticipate needs using
AI insights*

Respond

*Deliver the right
message, on the right
channel*

Shifting from reactive to **anticipation**

What Gets in the Way & How to Get Ahead of It

	Data-Overload	✓ Focus on intent-rich signals, not volume
	Generic AI Models	✓ Train on your consumer data, not out-of-the-box logic
	Over-Messaging	✓ Let relevance drive frequency, not campaign calendars

Start Small. Start Smart.

1

Map 3 moments you can predict

Think about your consumer signals, arrivals, pause & post purchase

2

Audit your data inputs

Are you collecting behavioural signals in real time?

3

Test 1 anticipatory trigger

Like a predicted interest email, timed to intent

Personalization got us here.
But *anticipation* will take us forward.

Thank You
Let's stay connected
