360° Audit - Buyer Persona

PRIMARY BUYER PERSONA: "I know the world and I know how to live it to the fullest."

Who are they?

Adult couples. High socio-cultural status, with above-average disposable income. For them, the best is normality, and they spend a lot on products and services. Busy with work and life, many are entrepreneurs, freelancers, and managers. They place extreme importance on the quality of their free time: cultural interests, personal care, sports, passions, wellness, and leisure.

Their typical vacation

Their vacations convey emotion, uniqueness, and even status/prestige. The destination (a careful mix of destination, location, and facility) must offer diverse experiences, as they tend to explore multiple alternatives before leaving. Vacations, whether permanent or itinerant depending on the time of year and season, are always understood as "journeys": destinations, facilities, and services are part of "a story." "Special" trips (weddings/special occasions) are important.

New Zealand, also known by its Maori name of Aotearoa, is a destination literally on the other side of the world from us.

Everything in this country seems born to amaze: the landscapes, the culture, the seasons reversed compared to ours (at Christmas, for example, it's summer in New Zealand), the pristine nature, and the spectacular beaches. A land of
